

*Feedstuffs for
calves and fattening bulls*

Compound feed for calves

TL - TOP STARTER - *muesli*

The feedstuff is intended for suckling calves from the 4th day until the end of the 6th week of age, when they already eat 1 kg of feed. Then we complement with the TL-STARTER feed until weaning. Because TL-TOP-STARTER is tasty, calves like to eat it alongside the milk distributer. Good hay and fresh water should always be available to the calves. TL-TOP-STARTER is made from hydrothermally treated corn and barley in the form of flakes or muesli, as well as whole maize and oats grains, which help expand and develop the rennet canal and the forestomach of the future ruminant. In addition, the mixed pellets contain highly digestible proteins, linseed, carob, vitamins and minerals.

Nutritional value:

crude protein 18%, ME 11 MJ/kg,

Packaging: BB bags, 25/1

TL-PRESTARTER - *pellets*

We start feeding TL-Prestarter feed to calves from the 1st week of age and up to the 10th week, when they already consume 1.8-2 kg of it per day. Then they can be weaned.

Nutritional value:

crude protein 18%, ME 11 MJ/kg

Packaging: BB bags, 30/1

TL - STARTER - *pellets*

We start feeding TL-starter to calves as early as the second week of age or after using TL-TOP-STARTER until weaning, when they eat at least 1.5 to 2 kg of it per day. **TL-STARTER is also intended for the fattening of calves to a higher slaughter weight.**

Nutritional value:

crude protein 20%, ME 11 MJ/kg

Special feature:

TL-STARTER is hydrothermally treated.

Packaging: bulk, BB bags, 30/1, 10/1

ZLATO ZRNO - pellets

The ZLATO ZRNO complementary compound feed is intended for fattening calves to a higher slaughter weight. In addition to the feedstuff, higher quality hay is desirable.

Nutritional value:

crude protein 18%, ME 10.5 MJ/kg.

Packaging: bulk, BB bags, 30/1, 10/1

TL - STARTER SUPER - pellets

TL-STARTER SUPER is a concentrated feedstuff for making calf starters.

Instructions for use:

TL-STARTER is made in such a way that the concentrate is easily diluted with domestically grown grains in a ratio of 1:1.

We recommend that the added grains are mostly pressed and not ground and only a small part of the grains remains whole.

Calves are fed with TL-STARTER as of the 4th day of age

Formula example:

Barley (pressed) 15 kg
Wheat (pressed) 10 kg
Maize (pressed) 10 kg
Oats (whole grain) 10 kg TL-
STARTER SUPER 50 kg
Molasses 5 kg

TOTAL 100 kg

Nutritional value:

crude protein 26%, ME 11.5 MJ/kg.

Packaging: bulk, BB bags, 30/1.

Calf fattening recommendation:

- **DENKAMILK ROYAL 40 IP**
- **DENKAMILK TOP S**
- **DENKAMILK EXTRA**

Purpose:

DENKAMILK ROYAL 40 IP, DEN-KAMILK TOP S and DEN-KAMILK EXTRA are intended as complete milk substitutes for rearing calves.

Preparation of the formula:

A litre of formula is made by dissolving 125 g of the milk substitute in 875 ml of water (in summer) or 150 g of the substitute in 850 ml (in winter) heated to 45 °C to 50 °C and mix everything thoroughly.

Compound feed for fattening bulls

TL - PIT - flour, pellets

The feedstuff is intended for fattening bulls from 150 kg live weight onwards. With its ingredients, the TL-PIT feedstuff balances feed rations consisting of grass and corn silage and hay in a high-quality manner. High daily weight gains in fattening bulls are achieved by feeding 3 - 4.5 kg of TL-PITA per fattening bull per day. In addition to TL- PITA, you also need to add RUMISALA ZA PITANCE.

Nutritional value:

crude protein 15%, ME 10.5 MJ/kg

Special feature: buffer active substances, B complex vitamins, the feedstuff does NOT contain urea.

Packaging: bulk, BB bags, 30/1

TL - PIT 25 - flour

The feedstuff is intended for fattening bulls from 180 kg live weight onwards. Bulls are fed it together with feed rations consisting of corn and grass silage and hay. High daily weight gains in fattening bulls (from 1,200 - 1,400 g/day) are achieved by feeding at least 2 kg of TL-PITA 25/fattening bull/day. In addition to TL-PIT 25, it is not necessary to add RUMISALA ZA PITANCE.

Nutritional value:

crude protein 25%, ME 10 MJ/kg

Special feature: buffer active substances, B complex vitamins, the feedstuff does NOT contain urea.

Packaging: bulk, BB bags

TL - PIT 35 - flour

The feedstuff is intended for fattening cattle from 200 kg live weight onwards. The TL-PIT-35 feedstuff with its ingredients perfectly balances feed rations consisting mainly of corn silage, little or no grass silage and hay. High daily weight gains in fattening cattle (from 1200 - 1400 g/day) can be achieved by feeding 1.5 kg TL-PIT-35/fattening cattle/day. In addition to TL-PIT 35, it is not necessary to add RUMISALA ZA PITANCE.

Nutritional value:

crude protein 35%, ME 10.0 MJ/kg

Special feature:

buffer active substances, vitamins of the B complex. The TL-PIT-35 feedstuff contains feed urea, so we recommend a gradual five-day introduction of the fattening cattle to the concentrate.

Packaging: bulk, BB bags, 30/1

ENERGETSKO KRMILO (ENERGY FEEDSTUFF) - pellets

The feedstuff effectively balances the energy deficit in feed rations for fattening cattle.

Nutritional value:

ME 11.0 MJ/kg, crude protein 9%

Special feature:

high energy value from grains

Packaging: bulk, BB bags

BIK - PIT 45 SUPER - flour

The compound feed BIK-PIT-45-SUPER is intended for fattening bulls from 200 kg of live weight. The feedstuff with its ingredients effectively complements maize silage and hay in a balanced meal for fattening bulls, which achieve high daily weight gains (1300-1400g/day) when consuming 1 - 1.25 kg of feed. Since BIK-PIT-45 SUPER is an extremely concentrated product, as it contains a high proportion of crude protein, all the necessary minerals and vitamins, we recommend that you do not feed the super concentrate on its own, but mix it into maize silage or dilute it with corn meal in a ratio of 2 to 3: 1.

Nutritional value:

crude protein 45%, ME 8.8 MJ/kg,

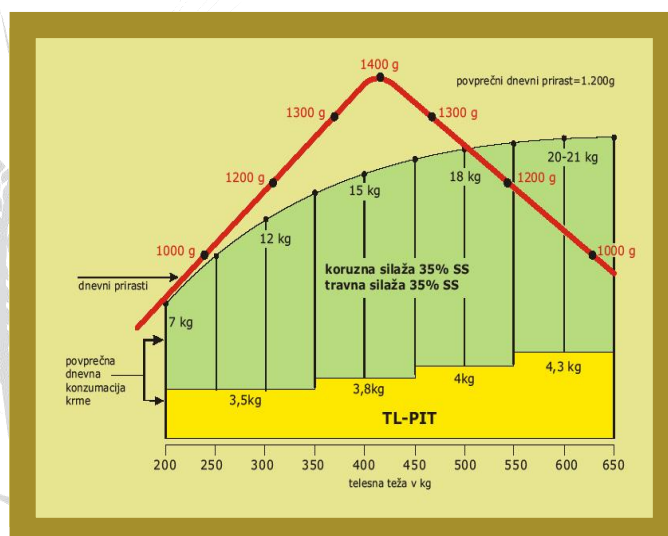

Special feature:

buffer active substances, vitamins of the B complex. Since the BIK - PIT 45 super feedstuff contains feed urea, the fattening cattle needs to be introduced to the concentrate for a period of ten days.

Packaging: BB bags, 30/1

MINERAL AND VITAMIN SUPPLEMENTS FOR FATTENING BULLS

RUMISAL ZA PITANCE (RUMISAL FOR FATTENING BULLS)

RUMISAL ZA PITANCE is a mineral and vitamin supplement to balance feed rations for fattening cattle, which are fed mainly with corn silage and smaller amounts of grass silage, hay and protein and energy feedstuff.

Dosage:

Add 100 g of it per day, mixed in the feed ration to fattening bulls

Added per kg:

calcium 21%, phosphorus 3%, sodium 8%, magnesium 3%;
vitamin A 500,000 IU, vitamin D3 100,000 IU, vitamin E 2,000 mg, vitamin B1 100 mg, vitamin B2 30 mg, vitamin B6 15 mg, vitamin B12 100 mcg; zinc 8,000 mg, manganese 4,000 mg, copper 500 mg, cobalt 20 mg, iodine 80 mg, selenium 30 mg.

Special feature:

buffer active substances, vitamins of the B complex.

The TL-PIT-35 feedstuff contains feed urea, so we recommend a gradual five-day introduction of the fattening cattle to the concentrate.

Packaging: BB bags, 30/1, 15/1

TOKSIFIKS UNIVERZAL

The TOKSIFIKS UNIVERZAL product is an effective binder of mycotoxins, possibly present in feed rations for fattening cattle.

INSTRUCTIONS FOR USE:

30 g/fattening cattle/day, in case of high feed contamination

50 g/fattening cattle/day

Packaging: 30/1, 4/1
