# *Basic program - COMPLETE compound feed*

## **PU - STARTER - pellets**

PU-STARTER is the complete compound feed for suckling and weaned piglets. You feed it from the 4<sup>th</sup> day of age until the piglet weighs 15 kg.

THE FEEDSTUFF IS DISTINGUISHED BY

- a high content of high-quality milk components and lactose, which support the immune system,
- it consists of protein components with a high digestibility and favourable AK composition, such as soy concentrates, potato protein,
- essential oils, which are natural, aromatic substances of plant extracts, are added. They are distinguished by strong anti-bacterial, anti-fungal, anti-viral and anti-inflammatory properties. They increase the appetite of animals and improve the utilisation of the consumed feed. They are an excellent booster of the immune system, stimulate the growth of intestinal villi and inhibit the development of intestinal parasites.
- The addition of lignocellulose stimulates the development of intestinal villi for better digestion and growth and prevents diarrhoea,
- added organic and tannic acids and enzymes
- added Bioplus 2B YC probiotic to support the immune system

*Analytical components and nutritional values:*

crude protein 18%, ME 14 MJ/kg, calcium 0.9%, phosphorus 0.5%, lysine 1.3%, crude fats 3.5%, methionine 0.5%, crude fibre 2.5%, threonine 0.9%, crude ash 5.4%, tryptophan 0.3%.

*Packaging:* 30/1, 10/1

## **PU - GROVER - pellets**

PU-GROVER is a complete compound feed for piglets from 15 kg to 30 kg of live weight. THE FEEDSTUFF IS DISTINGUISHED by added essential oils as natural aromatic substances of plant extracts with strong anti-bacterial, anti-fungal, anti-viral, anti-inflammatory and anti-inflammatory properties.

*Analytical components and nutritional values:*

crude protein 18%, ME 13.5 MJ/kg, calcium 0.9%, phosphorus 0.6%, lysine 1.2%, crude fats 3.3%, methionine 0.4%, crude fibre 4%, threonine 0.8%, crude ash 5.7%, tryptophan 0.2%

*Packaging:* 30/1

### **BEK - 1 - pellets**

BEK-1 is a complete compound feed for fattening pigs weighing from 30 kg to 65 kg of live weight. The feedstuff is distinguished by added essential oils as natural aromatic substances of plant extracts with strong anti-bacterial, anti-fungal, anti-viral and anti-inflammatory properties.

#### *Analytical components and nutritional values:*

crude protein 17%, ME 13 MJ/kg, calcium 0.7%, phosphorus 0.5 %, lysine 1%, crude fat 2%, metonine 0.3%, crude fibre 4.4%, threonine 0.7%, crude ash 5.2%, tryptophan 0.2%

*Packaging:* bulk, BB bags, 30/1

### **BEK - 2 -pellets**

BEK-2 is a complete compound feed for fattening pigs weighing from 65 kg to the end of fattening. The feedstuff is distinguished by added essential oils as natural aromatic substances of plant extracts with strong anti-bacterial, anti-fungal, anti-viral and anti-inflammatory properties.

#### *Analytical components and nutritional values:*

crude protein 16%, ME 13 MJ/kg, calcium 0.7%, phosphorus 0.5 %, lysine 0.9%, vegetable fats 2%, metonine 0.3%, crude fibre 4.6%, threonine 0.6%, crude ash 5%, tryptophan 0.2%

*Packaging:* bulk, BB bags, 30/1

### **S DOJ/BRE - goats**

S DOJ/BRE is a complete compound feed for pregnant and lactating sows. It is fed at will to lactating sows. After weaning, limit its consumption depending on the condition of the sow and its physiological needs. Pregnant sows are fed daily with 1.8 - 2.5 kg of the feedstuff. The amount of feedstuff is increased to 3 - 3.5 kg per day on the 85<sup>th</sup> day of pregnancy.

THE FEEDSTUFF features an added probiotic for improving health and immune resistance, which is transferred from the sow to the piglets through milk, added essential oils as natural aromatic substances of plant extracts with strong anti-bacterial, anti-viral and anti-inflammatory properties and increase the appetite and improve the utilisation of the consumed feed

#### *Analytical components and nutritional values:*

crude protein 17%, ME13MJ/kg, calcium 0.8%, phosphorus 0.6%, lysine 1.1%, crude fats 3%, metonine 0.4%, crude fibre 4.6%, threonine 0.7%, crude ash 5.7%, tryptophan 0.2%

*Packaging:* bulk, BB bags, 30/1

# Basic programme - super concentrates

## SUISUPER - PU -flour

SUISUPER-PU is a complementary protein-mineral-vitamin concentrate for piglets. This concentrate allows you to prepare a high-quality and inexpensive complete feedstuff for piglets weighing 9 to 30 kg using your grains.

THE FEEDSTUFF IS DISTINGUISHED by highly digestible proteins and includes added enzymes and probiotics, essential oils, lignocellulose.

### *Analytical components and nutritional values:*

crude protein 40%, calcium 2.6%, phosphorus 1.3%, crude fats 1.3%, lysine 3.3%, crude fibre 3%, methionine 1 %, crude ash 14.5%, threonine 1.7%, tryptophan 0.6%

*Packaging:* 30/1

## SUISUPER - BEK -flour

SUISUPER-BEK is a complementary protein - mineral - vitamin compound feed for fattening pigs from a weight of 30 kg until the end of fattening. With this concentrate, prepare a high-quality and cheap BEK-1 and BEK-2 complete feedstuff for fattening pigs using your own grains.

The feedstuff is distinguished by added essential oils as a natural aromatic substances of plant extracts with strong anti-bacterial, anti-fungal, anti-viral and anti-inflammatory properties.

### *Analytical components and nutritional values:*

crude protein 38%, calcium 3.4%, phosphorus 1.6%, crude

fats 1.8%, lysine 3.2%, crude fibre 6.5%, methionine 0.8%, crude ash 17%, threonine 1.6%, tryptophan 0.5%.

*Packaging:* bulk, BB bags, 30/1, 10/1

## SUISUPER - S -flour

SUISUPER-S is a complementary protein - mineral - vitamin compound feed for pregnant and lactating sows.

The feedstuff is characterised by added essential oils as natural aromatic substances of plant extracts with strong anti-bacterial, anti-fungal, anti-viral and anti-inflammatory properties and probiotics.

### *Analytical components and nutritional values:*

crude protein 40%, calcium 3%, phosphorus 1.6%, crude fats 3%, lysine 3.2%, crude fibre 5%, methionine 0.9%, crude ash 16%, threonine 1.6%, tryptophan 0.5%

*Packaging:* 30/1

# **Basic program –**

## **MINERAL and VITAMIN supplements**

### **MINERAL - BEK**

MINERAL-BEK is a mineral-vitamin mixture for fattening pigs from a weight of 30 kg to the end of fattening, with the help of which you can prepare complete BEK-1 and BEK-2 compound feed MINERAL-BEK is added in a concentration of min. **3%**. THE MVD MIXTURE IS DISTINGUISHED BY added essential oils to boost the immunity of the animals AK threonine and an excellent ratio of aminoacids.

#### ***Analytical components and nutritional values:***

calcium 20.5%, phosphorus 4%, lysine 6.5%, methionine 1.9%, sodium 5.5 %, threonine 0.9%.

**Packaging:** BB bags, 15/1

### **MINERAL - S**

MINERAL-S is a mineral-vitamin mixture for pregnant and lactating sows with the help of which you can prepare complete S-BRE and S-DOJ compound feed yourself. MINERAL-S is added in a quantity of **3.5%** for making S-BRE and **4%** for making S-DOJ. THE MVD MIXTURE IS DISTINGUISHED BY added essential oils to boost the immunity

#### ***Analytical components and nutritional values:***

calcium 20.5%, phosphorus 3.5%, lysine 5%, methionine 1.5%, sodium 5 %, threonine 1%.

**Packaging:** BB bags, 15/1

### **MINERAL - S TOP**

MINERAL-S TOP is a mineral-vitamin mixture for pregnant and lactating sows, with the help of which you can prepare the S-BRE and S-DOJ complete compound feeds yourself.

MINERAL-S TOP is added in a quantity **3.5%** for making S-BRE and **4%** for making S-DOJ.

THE MVD MIXTURE IS DISTINGUISHED BY added essential oils for boosting animal immunity, an excellent amino acid composition, added probiotics and enzymes and added L-Carnitine.

#### ***Analytical components and nutritional values:***

calcium 20.5%, phosphorus 3.5%, lysine 5%, methionine 2%, sodium 5%, threonine 1%.

**Packaging:** BB bags, 15/1

# Premium program - complete compound feeds

## PU - PRESTARTER PREMIUM - groats

Complementary compound feed for piglets, which you start feeding with it on the 4<sup>th</sup> day of age and up to 9 kg of body weight. During the suckling period, piglets consume an average of 1 to 1.5 kg of the PU-prestarter PREMIUM compound feed.

### THE FEEDSTUFF IS DISTINGUISHED BY

- a high content of high-quality milk components and lactose, which support the immune system
- it consists of protein components with a high digestibility and favourable AK composition, such as soy concentrates, potato protein, fish meal
- minerals in chelated form
- the addition of lignocellulose promotes the development of intestinal villi for a better digestion and weight gain
- organic and tannic acids
- the Bioplus 2B YC probiotic supports the immune system
- heat-hydrothermally treated grains
- added Bioplus 2B YC probiotic to support the immune system

### *Analytical components and nutritional values:*

crude protein 19%, ME 14 MJ/kg, calcium 0.9%, phosphorus 0.5%, lysine 1.3%, crude fat 4%, metonine 0.5%, crude wool-quinine 2.5%, threonine 0.9%, crude ash 5.4%, tryptophan 0.3%.

**Packaging:** 30/1, 10/1

## PU - STARTER PREMIUM - groats

The complete compound feed for feeding weaned piglets from a weight of 9 - 15 kg.

### THE FEEDSTUFF IS DISTINGUISHED BY

- a high content of high-quality milk components and lactose, which support the immune system
- it consists of protein components with a high digestibility and favourable AK composition, such as soy concentrates, potato protein, fish meal
- chelated forms of minerals
- the addition of lignocellulose promotes the development of intestinal villi for a better digestion and weight gain
- organic and tannic acids
- the Bioplus2BYC probiotic supports the immune system

### *Analytical components and nutritional values:*

crude protein 18%, ME 14MJ/kg, calcium 0.9%, phosphorus 0.5%, lysine 1.3%, crude fats 4.2%, metonine 0.5%, crude fibre 2.5%, threonine 0.9%, crude ash 5.4%, tryptophan 0.3%.

**Packaging:** 30/1

## PU - GROVER PREMIUM - *groats*

A complete compound feed for feeding pigs weighing from 15 to 30 kg.

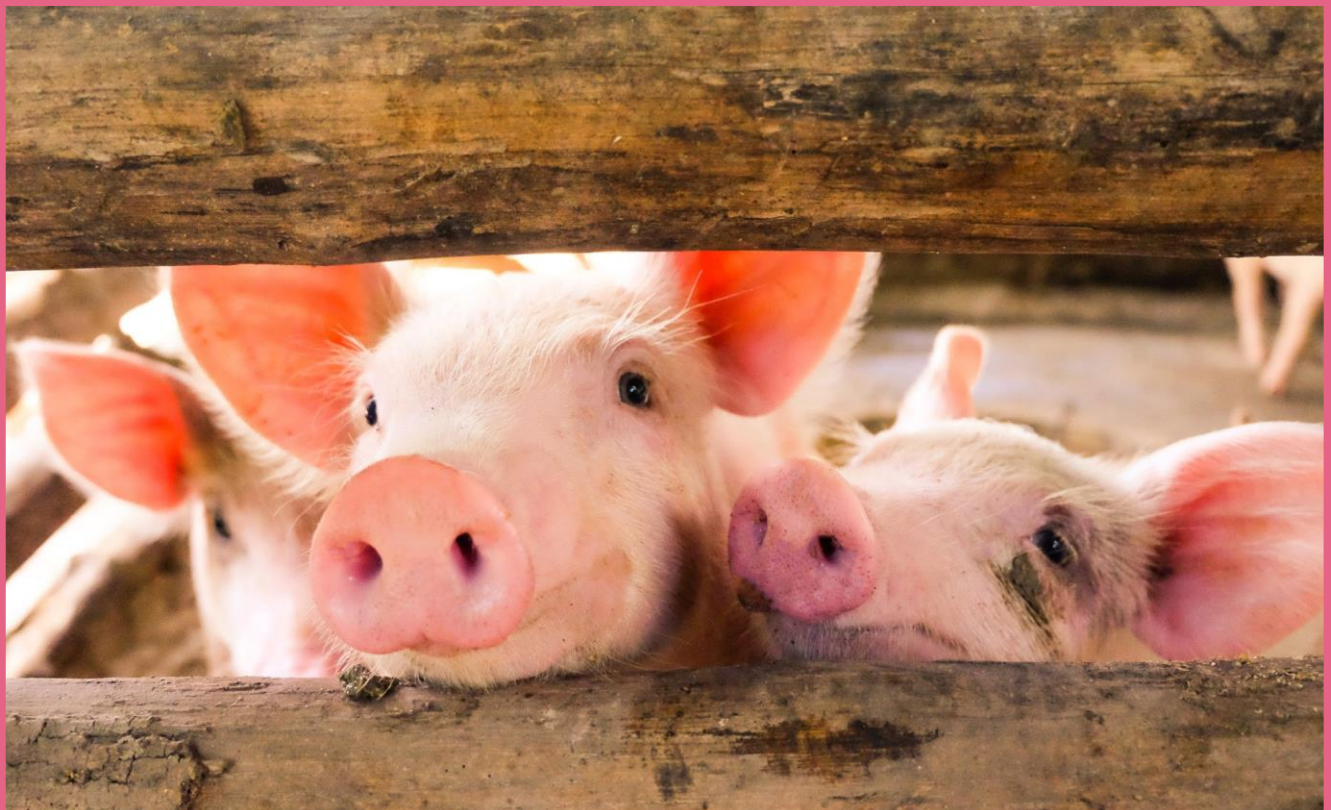

THE FEEDSTUFF IS DISTINGUISHED BY:

- chelated forms of minerals

### *Analytical components and nutritional values:*

crude protein 17%, ME 13.5MJ/kg, calcium 0.65%, phosphorus 0.4%, lysine 1.1%, crude fats 4%, metonine 0.35%, crude fibre 4%, threonine 0.8%, crude ash 4.7%, tryptophan 0.2%.

*Packaging:* 30/1

# Premium programme - super concentrates

## PU - STARTER SUPER PREMIUM - flour

The complementary compound feed is intended for the domestic preparation of the complete PU-STARTER PREMIUM compound feed for breeding piglets from 9 - 15 kg of body weight. THE FEEDSTUFF IS DISTINGUISHED BY the content of fish meal and a chelated form of minerals.

### *Analytical components and nutritional values:*

crude protein 33%, ME 14.8 MJ/kg, calcium 2.3%, phosphorus 1 %, lysine 3.3%, crude fats 8.5%, metonine 1%, crude fibre 2.7%, threonine 1.7%, raw ash 11.8%, tryptophan 0.5%.

*Packaging:* 30/1

## PU - GROVER SUPER PREMIUM - flour

The complementary compound feed is intended for the domestic preparation of a complete PU-GROVER PREMIUM compound feed for pigs from 15 - 30 kg of body weight.

### *Analytical components and nutritional values:*

crude protein 35%, ME 13.7MJ/kg, calcium 2%, phosphorus 0.7%, lysine 3%, crude fat 8.5%, metonine 0.7%, crude fibre 5.2%, threonine 1.7%, crude ash 11.5%, tryptophan 0.5%.

*Packaging:* 30/1

## S - BRE SUPER PREMIUM - flour

The complementary compound feed is intended for the domestic preparation of a complete S-BRE PREMIUM compound feed for pregnant sows.

### *Analytical components and nutritional values:*

crude protein 30%, ME10.8MJ/kg, calcium 2.3%, phosphorus 1%, lysine 1.9%, crude fat 1.6%, metonine 0.5%, crude fibre 10.5%, threonine 1.3%, crude ash 13.5%, tryptophan 0.3%.

*Packaging:* 30/1

## S - DOJ SUPER PREMIUM - flour

The complementary compound feed is intended for the domestic preparation of a complete S-DOJ PREMIUM compound feed for lactating sows

### *Analytical components and nutritional values:*

crude protein 31.5%, ME 12.6 MJ/kg, calcium 3%, phosphorus 1%, lysine 2%, crude fats 7%, methionine 0.5%, crude fibre 7%, threonine 1.3%, crude ash 15%, tryptophan 0.4%.

*Packaging:* 30/1

# ***Premium programme – MINERAL and VITAMIN supplements***

## **PU - GROVER MVD PREMIUM**

The PU-GROVER MVD PREMIUM mineral compound feed is a high-quality mineral-vitamin supplement for fast-growing pigs from 15 to 30 kg of body weight. By using **4%** of this product and domestically grown grain and protein raw materials, you can prepare a high-quality PU-GROVER PREMIUM complete feedstuff.

### ***Analytical components and nutritional values:***

calcium 18.5%, phosphorus 4%, lysine 7%, methionine 2.5%, sodium 5%, threonine 2.5%, tryptophan 0.5%.

***Packaging:*** BB bags, 15/1

## **PU - PIT MVD PREMIUM**

The PU-PIT MVD PREMIUM mineral compound feed is high-quality mineral and vitamin supplement for fattening pigs from 30 kg to the end of fattening. By using **3%** of this product and home-grown grains and protein raw materials, you can prepare the complete BEK-1 and BEK-2 feedstuff for fattening pigs.

### ***Analytical components and nutritional values:***

calcium 20.5%, phosphorus 3.5%, lysine 7.5%, methionine 1.8%, sodium 6 %, threonine 1.5%.

***Packaging:*** BB bags, 15/1

# *Special products*

## **RUDNINKA**

Mineral compound feed for pigs for complementing the existing ration with minerals and vitamins.

### *Analytical components and nutritional values:*

calcium 26%, zinc 3,300 mg, phosphorus 8%, copper 700 mg, sodium 8.5%, iron 2,000 mg, vitamin A 200,000 IU, manganese 900 mg, vitamin D3 20,000 IU, iodine 30 mg.

*Packaging:* 5/1

## **TOKSIFIKS UNIVERZAL**

The TOKSIFIKS UNIVERZAL is an effective binder of mycotoxins present in feed rations for pigs.

*Packaging:* 30/1
