Feedstuffs for
horses

Eq-win line

EQ-WIN STARTER - *pellets*

The complementary compound feed is in the form of pellets and is intended for the complementary feeding of foals while they are still with their mother and after weaning up to one year of age. The Starter enables a healthy growth and development of the muscles and skeleton of foals.

Instructions for use:

At the beginning of growth, the Starter is fed to the foals at will, later - after weaning, it is dosed from 1 to 2 kg per day. Make sure that the mother mare does not reach the Starter. In addition to the Starter, adding quality hay or pasture is recommended. Clean drinking water must be available to the foals.

Nutritional value:

crude protein 15%, ME 10.3 MJ/kg, crude fats and oils 5.6%, crude fibre 7%, Ca 1%, P 0.6%, Na 0.3%, Mg 0.35%.

Packaging: 20/1

EQ-WIN SPORT - *muesli*

The feedstuff is intended for the nutrition of sports, race, and competition horses. The feedstuff contains primarily rice and barley and does not contain oats. The feedstuff covers the loads of sport horses in terms of quickly accessible energy and amino acids, vitamins and minerals and helps to overcome stress. You can add any amount of oats to the feed, up to a maximum of 25%!

Instructions for use:

Together with oats, feed the horse 1 to 1.2 kg of the mixture and 1 to 1.5 kg of hay per 100 kg of the horse's live weight.

Nutritional value:

crude protein 12%, ME 11.5 MJ/kg, crude fats 5.5

%, crude fibre 7%, crude ash 7%, calcium 0.9%, phosphorus 0.4%, sodium 0.4%.

Packaging: 20/1

EQ-WIN VITAL - pellets

The EQ-Win Vital complementary feedstuff for horses consists of easily digestible fibre from dehydrated alfalfa, linseed, pumpkin cake and herbs and is corn-free. It is an optimum diet for breeding mares and sport horses, older horses, horses with laminitis and other metabolic disorders caused by excessive grain feeding.

Instructions for use:

Pregnant and lactating mares are given up to 3 kg per day, weaned foals at will, in addition to hay and pasture. Sport active and older horses with metabolic disorders or laminitis are given from 0.8 kg of feed per 100 kg of the horse's body weight.

Nutritional value:

crude protein 16%, crude oils and fats 5%, crude

fibre 18%, crude ash 10%, calcium 1.2%, phosphorus 0.5%,

Mg 0.3%, sodium 0.25%.

Packaging: 20/1

Complementary compound feed

KON-1 - pellets

The KON-1 complementary compound feed for horses is intended for feeding sports horses and pregnant and lactating breeding mares. A favourable ratio between energy, proteins, vitamins and minerals enables optimum care and healthy development of growing animals, support during training or stress, maintenance of fitness and quality nutrition of lactating mares.

Instructions for use:

We recommend feeding the KON-1 compound feed up to 1 kg/100 kg of body weight for lighter efforts and 1 to 1.5 kg/100 kg of body weight for heavier stress, lactating mares 1 kg of feed/100 kg of body weight per day, in addition to quality hay or pasture.

Nutritional value:

crude protein 14%, ME 10 MJ/kg, crude fats 3.8%, crude fibre 11%, crude ash 7%, calcium 0.9%, phosphorus 0.5%, sodium 0.3%.

Packaging: 30/1

KON-2 - pellets

The KON-2 complementary compound feed for horses KON-2 does not contain oats. The compound feed is suitable for feeding sports horses and breeding mares. The high content of proteins, vitamins and minerals adequately complements the nutrients of oats and thus enables optimum care and healthy development of growing animals, support during training or stress, maintenance of fitness and quality nutrition of lactating mares.

Instructions for use:

We recommend feeding the KON-2 compound feed up to 0.7 kg/100 kg of body weight for lighter efforts and up to 1.2 kg/100 kg of body weight for heavier stress. The amount of oats in the grain is adjusted to the intensity of the work or training. Per 0.7 kg of the KON-2 compound feed, add another 0.3 to 0.5 kg of oats as grain. Quality hay or pasture is available.

Nutritional value:

crude protein 14%, ME 10.3 MJ/kg, crude fats 4 %, crude fibre 10%, crude ash 8%, calcium 0.9%, phosphorus 0.6%, sodium 0.4%.

Packaging: BB bags, 30/1

ŽITKO - pellets

ŽITKO is a complementary compound feed intended for all active or maintenance categories of horses as an excellent source of easily digestible energy. The main feed ration should be quality hay or pasture.

Instructions for use:

It is fed to horses in the amount of 1 to 4 kg per day, depending on the category of horses, the fitness level of the horse and the activity and physical stress of the horse. In addition to the feedstuff, we recommend feeding KOVISAL vitamin-mineral mixture for horses or Solnik-K for horses that are grazing.

Nutritional value:

crude protein 10%, ME 10.3 MJ/kg, sugars 4.2%, crude fats and oils 3.8%, crude fibre 6%, Ca 0.8%, P 0.4%, Na 0.2%, Mg 0.3%.

Packaging: BB bags, 30/1

ŽITKO VITA - pellets

Complementary compound feed intended for breeding mares and foals for fattening. The feedstuff covers the nutritional needs of both pregnant and foaled mares in addition to quality hay or grazing. Foals are fed the feedstuff after weaning until the start of sports activity, as well as foals intended for fattening to a higher weight. The amount of feed is adapted to the quality of the hay or grazing and the physical fitness of the animal.

Instructions for use:

We recommend from 2 to 4 kg per day to breeding mares, and foals from 1 kg at the beginning and up to 3 kg per day for fattening or breeding.

Nutritional value:

crude protein 13%, ME 9.8 MJ/kg, crude fats and oils 2.5%, crude fibre 9%, Ca 1%, P 0.5%, Na 0.25%, Mg 0.3%.

Packaging: BB bags, 30/1

POWER - JUMP - pellets

POWERJUMP is a complementary compound feed for race and competition horses, consisting of the highest quality grains and protein components as well as carob. A favourable ratio between energy and proteins, vitamins and minerals provides race and competition horses with an optimum supply of nutrients, in addition to quality hay or grazing.

Instructions for use:

The POWER JUMP compound feed is fed to race and competition horses from 0.8 kg to 1.2 kg per 100 kg of body weight, in addition to hay or grazing. The daily amount of feed depends primarily on the intensity of training, age and fitness of the animal.

Nutritional value:

crude protein 14%, ME 10 MJ/kg, crude fats and oils 4%, crude fibre 11%, Ca 1%, P 0.5%, Na 0.25%, Mg 0.3%.

Packaging: BB bags, 30/1

FEEDSTUFF FOR SPORTS HORSES (KRMIL ZA ŠPORTNE KONJE) - pellets

The complementary compound feed is intended for the nutrition of professional sports horses. The compound feed consists of the highest quality selected raw materials that cover the nutritional needs of competition horses (trotters).

Instructions for use:

The compound feed is fed to sports, race and competition horses in the following doses:

- 0.75 kg feedstuff/100 kg body weight, for light work
- 1 to 1.5 kg feedstuff/100 kg body weight for training or competition

In addition to feed, quality hay, oats and drinking water are added.

Nutritional value:

crude protein 16%, ME 10.2 MJ/kg, crude fats and oils 3%, crude fibre 9%, Ca 0.8%, P 0.5%, Na 0.3%, Mg 0.3%.

Packaging: 30/1

Mineral and vitamin supplements

KOVISAL

KOVISAL is a mineral and vitamin supplement for sports and work horses. If used correctly on a daily basis, it ensures a balanced supply of macro and micro minerals and vitamins to animals.

Instructions for use:

Category	Daily needs	Quantity
Sports horses	100 - 150 g	3 - 5 spoons
Heavily pregnant /lactating mares	150 - 200 g	5 - 7 spoons
Foals	40 - 50 g	1 - 2 spoons
Yearlings and smaller horses	50 - 100 g	2 - 3 spoons

Added per 1 kg:

calcium 16.5%, phosphorus 5.5%, sodium 7%, vitamin A 700,000 IU, vitamin D3 70,000 IU, vitamin E 7,000 mg, vitamin K3 120 mg, vitamin B1 600 mg, vitamin B2 10 mg, vitamin B6 480 mg, vitamin B12 1,080 mcg, vitamin C 9,600 mg, niacin 960 mg, Ca-pantothenate 1,200 mg, choline chloride 10,800 mg, folic acid 120 mg, biotin 9.6 mg; zinc 3,600 mg, copper 600 mg, iron 4,800 mg, manganese 3,100 mg, cobalt 8.4 mg, iodine 15 mg, selenium 10 mg.

Packaging: 5/1

SOLNIK-K

SOLNIK-K (BRINE-K) is intended for complementing primarily grazing rations for horses with sodium and micro minerals. The brine should be available to the animals at all times, together with a sufficient amount of fresh drinking water.

Added per 1 kg:

sodium 37%, zinc 1,100 mg, manganese 600 mg, iodine 30 mg, cobalt 11 mg, selenium 6 mg.

Packaging: 3/1 (6 pcs/carton)
