ORGANIC feed for cattle, horses, pigs, small ruminants and poultry

E-ENERGETSKO (E-ENERGY)

Complementary feedstuff intended for breeders who need an energy-rich feed to balance the basic rations on pasture, green fodder, grass silage and hay. The feedstuff can be fed to cattle, small ruminants, pigs and horses.

Composition:

corn, barley, triticale, alfalfa.

E-K 18

Complementary feedstuff enriched with 18% crude protein. It is intended for breeders who need to upgrade their rations with more protein feed to improve the milk yield of cows and rearing calves. The feedstuff can also be used for other animals upon consultation with our consultants.

Composition:

corn, barley, triticale, alfalfa, sunflower cakes, soybean cakes.

E-BELJAKOVINSKO KRMILLO (E-PROTEIN FEEDSTUFF)

Protein concentrate with 30% crude protein. It is used to balance the protein poor feed rations. This feedstuff can be used to prepare your own compound feed with the addition of home-grown grains. It is suitable for cattle, pigs, small ruminants, poultry.

Composition:

soybean cakes, sunflower cakes, alfalfa.

E-BEK

The complete compound feed is intended for breeding piglets from their birth onwards. It is also suitable for the breeding of Krškopolje pigs.

Composition:

barley, corn, sunflower cakes, soybean cakes, mineral and vitamin supplements.

E-BRO STARTER

A complete compound feed for breeding broilers from the first day up to one month of age. Suitable for breeding in the farm yard or for greater breeding.

Composition:

corn, soybean cakes, sunflower cakes, wheat, mineral and vitamin supplements.

E-BRO FINISHER (E-BRO FINIŠER)

A complete compound feed for breeding broilers from one month of age. Suitable for breeding in the farm yard or for greater breeding.

Composition:

corn, soybean cakes, sunflower cakes, wheat, mineral and vitamin supplements.

E-NSK - groats

Complete feedstuff for layers in organic farming. Contains a natural colour additive for a more intense colour of the yolk even on winter days when there is no grazing.

Composition:

corn, barley, triticale, sunflower cakes, soybean cakes.

E-OVCE

Complementary feed intended for breeders of small ruminants who are looking for- high-quality feedstuffs for a good milk yield in sheep. It contains 15% crude protein, a high proportion of energy and the corresponding mineral and vitamin supplements.

Composition:

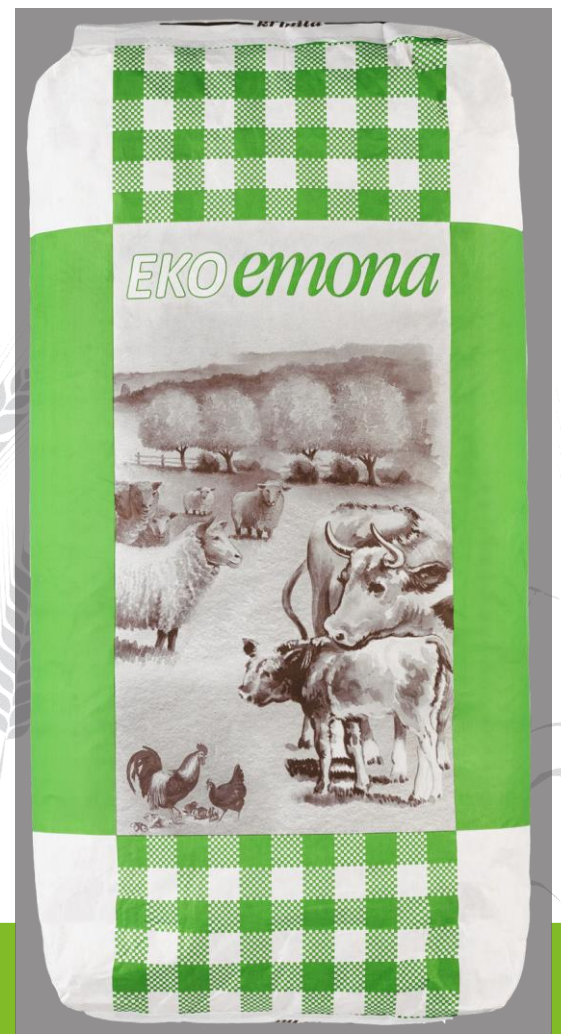

corn, barley, triticale, alfalfa, sunflower cakes, soybean cakes.

E-JGN

Complementary feed, which is energy and protein balanced for fattening lambs. The feed is given to the lambs at will.

Composition:

corn, barley, triticale, alfalfa, sunflower seeds, soybean cakes.
